

Public Health and Preventive Medicine in the 21st Century

by

Juan Nieve

B.A. (Harvard University) 2000

M.P.H. (University of California, Berkeley) 2003

A dissertation submitted in partial satisfaction of the
requirements for the degree of
Doctor of Philosophy

in

Public Health

in the

Graduate Division

of the

University of California, Berkeley

Committee in charge:
Professor James Lind, Chair
Professor John Graunt
Professor William Farr

Spring 2006

The dissertation of Juan Nieve is approved:

Abstract

Public Health and Preventive Medicine in the 21st Century

by

Juan Nieve

Doctor of Philosophy in Public Health

University of California, Berkeley

Professor James Lind, Chair

An abstract is required for the doctoral dissertation and is optional for the masters thesis. If you decide to include an abstract in your thesis, it must conform to the requirements listed here. Follow the spacing shown on the sample page.

Your committee chair or co-chairs signify approval by signing the last page of the original abstract. The signed abstract is included in the copy of the manuscript that we send to the Library. Please ask your chair to use blue or black ink and to observe the margin restrictions by not signing in the margin area.

On the first page of the abstract, the word "Abstract" must head the page followed by the title of your dissertation (or thesis), your registered student name, the degree and major being awarded, all exactly as they appear on your title page. Follow this information with the words "University of California, Berkeley" and the name of chair or co-chairs of your committee exactly as it appears on your title page. If you have co-chairs, a separate line is used for each name.

An abstract consists of a brief statement of the problem, a brief explanation of

the method or procedure used, and a summary of the findings of the study. The abstract must be in English, even if you have received special approval from the Graduate Council to submit your manuscript in a foreign language.

The abstract for the doctoral dissertation is published by ProQuest and must not exceed 350 words in length. If the abstract is longer than that, ProQuest will edit your abstract.

Professor James Lind
Dissertation Committee Chair

Preface

This UC Berkeley PhD Thesis template was adapted from the `ucthesis` package available from <http://www.ctan.org/tex-archive/macros/latex/contrib/ucthesis/>.

I have incorporated my biases from public health and preventive medicine.

Tomás Aragón

Put your acknowledgments here.

Chapter 1

Introduction

The following paragraphs were adapted from: How to Write a PhD Thesis, by Joe Wolfe, Available from: <http://www.phys.unsw.edu.au/~jw/thesis.html>.

What is the topic and why is it important? State the problem(s) as simply as you can. Try to step back mentally and take a broader view of the problem. How does it fit into the broader world of your discipline?

Do not overestimate the reader's familiarity with your topic. You are writing for researchers in the general area, but not all of them need be specialists in your particular topic.

Where did the problem come from? What is already known about this problem? What other methods have been tried to solve it?

Make sure that you do not omit relevant papers by researchers who are like to be your examiners, or by potential employers to whom you might be sending the thesis in the next year or two.

Chapter 2

First publishable paper title

2.1 Introduction

Here I cite some references [1–4]. I used the `cite` package to make citations like this: [1, 2, 3, 4], converted to [1-4].

2.2 Methods

2.2.1 Tables

Here I display tables using the `tabular` environment (Figure 2.1), the `smalltabular` environment (Figure 2.2), and the `scriptsizetabular` environment (Figure 2.3).

Table 2.1: A 2×2 table using the `tabular` environment

	Disease	
Exposure	Yes	No
Yes	<i>a</i>	<i>b</i>
No	<i>c</i>	<i>d</i>

Table 2.2: A 2×2 table using the `smalltabular` environment

	Disease	
Exposure	Yes	No
Yes	<i>a</i>	<i>b</i>
No	<i>c</i>	<i>d</i>

2.3 Results

2.3.1 Figures

Now I display a couple of Encapsulated PostScript (EPS) figures (Figures 2.1 and 2.2).

2.4 Discussion

Table 2.3: A 2×2 table using the `scriptsizetabular` environment

	Disease	
Exposure	Yes	No
Yes	<i>a</i>	<i>b</i>
No	<i>c</i>	<i>d</i>

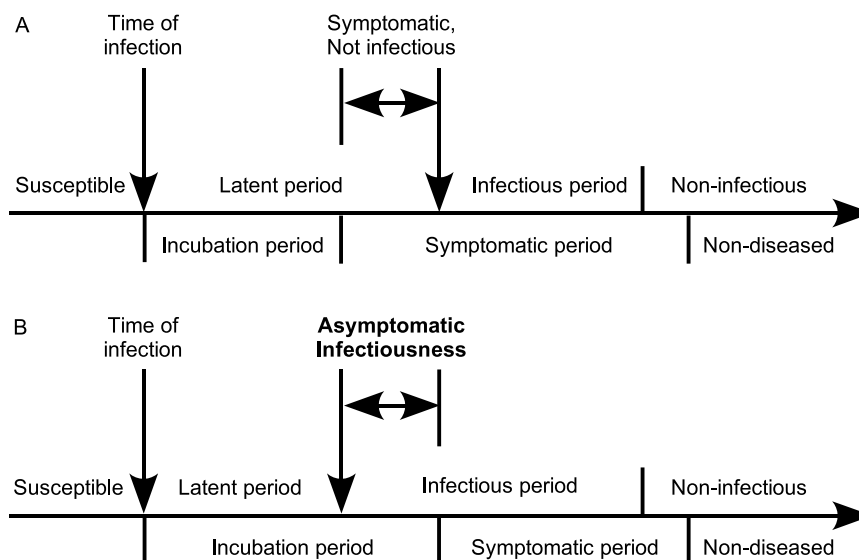

Figure 2.1: Example of graphic created in OpenOffice.org Draw program and exported as an Encapsulate PostScript (EPS) file: The natural history of infection and infectiousness

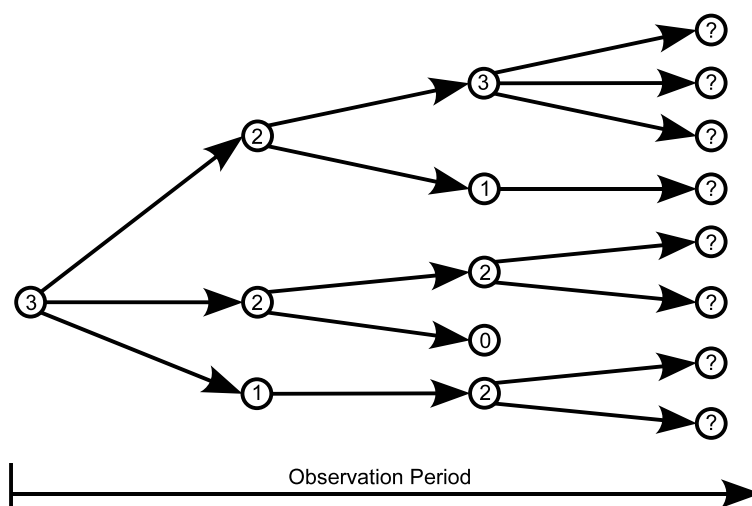

Figure 2.2: Example of graphic created in OpenOffice.org Draw program and exported as an Encapsulate PostScript (EPS) file: The reproductive number in infectious disease transmission dynamics

Chapter 3

Second publishable paper title

3.1 Introduction

3.2 Methods

3.3 Results

3.4 Discussion

Chapter 4

Third publishable paper title

4.1 Introduction

4.2 Methods

4.3 Results

4.4 Discussion

Chapter 5

Conclusions

Put your conclusions here.

Appendix A

Title of first appendix

The contents of the first appendix goes here.

Did you know that the plural for a publication appendix is appendixes, not appendices?

Appendix B

Title of second appendix

The contents of the second appendix goes here.
